CAREER SUMMARY

Computer Science undergraduate with a **9.6/10 CGPA** and strong knowledge of Data Structures, Algorithms, OOP, Operating Systems, and DBMS. Built and deployed **3 web and desktop applications** using MERN and Java technologies. Experienced in REST APIs, role-based authentication, CRUD operations, databases, and cloud deployment. Seeking a **Software Development / SDE Internship** to apply programming skills and gain industry experience.

TECHNICAL SKILLS

Programming Languages: C, C++, Java, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, JDBC

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render, Maven

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS

Practices: CRUD Development, Role-Based Authentication, API Integration, Debugging & Testing

PROJECTS

HopeBridge – Medicine Donation Platform

[Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS (MERN)

- Built a full-stack medicine donation platform for **listing, tracking, and managing medicine inventory** using CRUD operations.
- Implemented **role-based authentication** for Donor and Needy users using REST APIs.
- Integrated **Aadhaar OCR** for identity verification and streamlined the user onboarding process.
- Developed a **responsive UI** with Tailwind CSS and added dark and light modes for better usability.

PropEase – Property Management System

Tech Stack: Java, JavaFX, MySQL, JDBC, Maven

- Developed a desktop-based Property Management System with **8 functional modules**, including Customers, Properties, Deals, and Dashboard Analytics.
- Implemented **CRUD operations** for customers, properties, and deals using JDBC and MySQL.
- Added **search and filtering** features across 3 core modules for faster data lookup.
- Applied **input validation and exception handling** using a modular Java architecture.
- Managed project dependencies and builds using **Maven**.

Shiv Shakti General Store – Full-Stack E-Commerce Platform

[Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce platform for **product browsing, shopping, and order management** using React.js, Node.js, Express.js, and MongoDB.
- Developed **REST APIs** for product and order management with Node.js and Express.js.
- Designed a **responsive interface** for smooth shopping across desktop and mobile devices.
- Deployed the application and managed the **development-to-deployment workflow**.

ACHIEVEMENTS & CODING PROFILES

- Regularly solve** Data Structures & Algorithms problems on LeetCode to improve problem-solving skills.
- Maintain** an active GitHub profile with 3 version-controlled projects and ongoing development work.
- Competed in **SATHACK'25**, a hackathon at Thapar Institute of Engineering & Technology (Nov 2025).
- Participated in "**Cipher Sprint: Decode the Run, Win the Fun**", hosted by the CSE Department and Coding Blocks CUIET Chapter, Chitkara University (Nov 2024).

EDUCATION

Bachelor of Engineering and Technology in Computer Science

Jul 2024 – May 2028

Chitkara University, Punjab, India | CGPA: 9.6 / 10
